

SKUNK SCRAM[™] PROFESSIONAL

APPLICATION INSTRUCTIONS

SKUNK SCRAM PROFESSIONAL[™] provides strong repelling power without harming pets, people or the environment.* This new product was specially formulated *and tested* to naturally train skunks to avoid treated areas and is both easily applied and long lasting.

FOR YARDS: Starting from the center portion of the damage, sprinkle by lightly shaking the repellent in a circular pattern away from the damage. You will notice in 3-4 days no additional damage and may notice more activity outside the perimeter of the applied repellent. Repeat application towards the direction in which you want the skunks to exit the property.

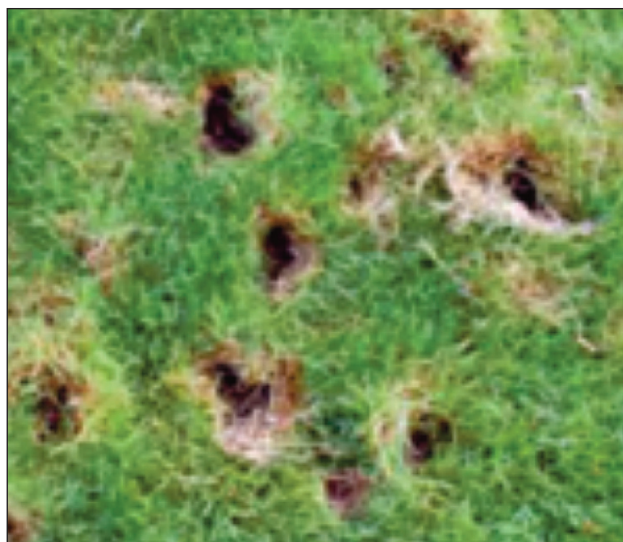

AROUND HOMES, SHEDS & STRUCTURE:

Apply a 20 inch band along the foundation so that you may visibly see the repellent.

UNDER DECKS, CRAWL SPACES

AND OTHER HIDDEN AREAS: Skunks may nest under hard to get areas. Put a golf ball size of Skunk Scram[™] in a small nylon or cheese cloth bag and throw under the structure. Once you feel they have vacated the area, apply outside the perimeter to keep them out. This will stop the problem and only a single band nearest the applied are will be needed thereafter for maintenance applications going forward.

Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water.

**When used as directed.*
